DETAILED ACTION

Allowable Subject Matter

1. Claims 1-2, 4-14, 16-18 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to independent claim 1, the prior art reference either alone or in combination fails to disclose, teach or suggest a vehicle suspension particularly comprising: a control unit for determining a road surface profile by estimating wavelength and amplitude of irregularities of the road surface, wherein the control unit changes the suspension control value to a value suitable for a rough road section before the vehicle has entered the rough road section. These structures in combination with other structures as recited in claim 1 define over prior art of record.

With respect to independent claim 8, the prior art reference either alone or in combination fails to disclose, teach or suggest a vehicle suspension particularly comprising: a control unit for determining a road surface profile by estimating wavelength and amplitude of irregularities of the road surface, and for determining a suspension control value based on the road surface profile. These structures in combination with other structures as recited in claim 8 define over prior art of record.

With respect to independent claims 16-17, the prior art reference either alone or in combination fails to disclose, teach or suggest a vehicle suspension method particularly comprising: determining a road surface profile by estimating wavelength and amplitude of irregularities of the road surface, and determining a suspension control

value based on the road surface profile. These steps in combination with other step as recited in claims 16-17 define over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
